Python - Excellent

Java - Good

C - Good

Database

MySQL

Soft Skills

Adaptability

Openness to Feedback

Resilience

Certificates

Django - Python Based Web Framework

Workshop - CIT

Projects

Smart Eye

The Smart Glass-Based Supermarket Navigation System is a solution focussed to empower visually impaired individuals during their supermarket visits. Recognizing the challenges faced by the visually impaired in navigating shopping marts independently, our team developed a system to provide real-time assistance without the need for manual support.

Car Rental System

Designed the frontend for a Car Rental System, focusing on creating user-friendly interface for customers. The designed frontend enhances the overall user experience, providing a visually appealing and functional interface for customers interacting with the Car Rental System.

Professional Experience

Front end Developer

Coimbatore

NxtLogic Software Solutions

Completed my internship in the area of web development and designed a web application
